NOTICE OF RESTORATION

Watermain replacement and improvement

Sharlyn Road, Lenworth Drive, Wharton Way and Berkel Road
Project 24-1310 F

Peel Region will be repairing driveways, roads, curbs, sidewalks, and sod (grass), following the replacement of the watermain along Sharlyn Road, Lenworth Drive, Wharton Way and Berkel Road.

Restoration schedule

Restoration work will start in early September on Sharlyn Road, Lenworth Drive, Wharton Way and Berkel Road. We plan to complete all work by **mid-October 2026**, weather permitting. Restoration will begin by fixing curbs and sidewalks, followed by driveway and road paving repairs, and finally sod replacement. This will take approximately 6 weeks.

Please note that repairs may be delayed due to contractor availability or weather conditions.

For example:

- Paving cannot take place when the ground is saturated with water, or the temperature is below 3°C.
- Asphalt is not available in large volumes during the winter. It usually becomes available around mid-May.
- Most sod farms are located north of Peel. They usually have sod available starting in late May. We'll replace the sod on your property once it is available.
- In summer, we may need to postpone sod replacement due to hot, dry weather.
- We replace sod only until the middle of November, weather permitting, to let the sod grow roots. If we do not repair your lawn by the middle of November, we'll replace the sod the following spring.

Contractor working hours

The work will be completed by World Quality Construction Inc. under contract to Peel Region. Working hours are from 7 a.m. to 7 p.m., Monday to Friday. These hours are consistent with local municipal bylaws and help shorten the amount of time construction is in your neighborhood.

Traffic and parking

We may need to temporarily close roads or reduce traffic to a single lane. If this is needed, we will place signs giving directions. On-street parking will be reduced when we are working on your street.

Construction safety

Construction zones require extra caution to keep everyone safe. Be aware of your surroundings when driving, walking, or biking near the construction area. Watch for construction crews and other road users, slow down, and consider other routes. Visit peelregion.ca/workzonesafety for more information.

In-ground sprinkler systems

If the area in front of your home was affected by construction, in-ground sprinkler lines may be impacted during the upcoming restoration work. **We strongly recommend moving any sprinkler lines in the municipal right-of-way or next to the sidewalk.** The municipal right-of-way includes the street and the municipal-owned land between the street and the water service box, a small, round, metal valve located outside on the property line between your home or business and the road.

If you cannot move these sprinkler lines, send us your irrigation map or flag each sprinkler head within one meter of the sidewalk, curb, or driveway. This will allow us to minimize the impact to your sprinkler system.

Driveway access and parking

We may block your driveway for a short time to pave the road. We'll ensure businesses can be accessed when possible. Contact us if you have any access needs.

Please avoid parking on your driveway when it is being repaired. We'll knock on your door before driveway work begins. If you will not be home weekdays between 7 a.m. and 7 p.m., do not leave any vehicles on the driveway. Avoid driving on new asphalt for the first three hours and parking on it for one day after paving.

We have arranged for alternate parking on Sharlyn Road, Lenworth Drive, Wharton Way and Berkel Road with the City of Mississauga until **mid-October 2026**. All other parking laws remain in place, including proper clearance from hydrants and stop signs.

Replacing grassy areas

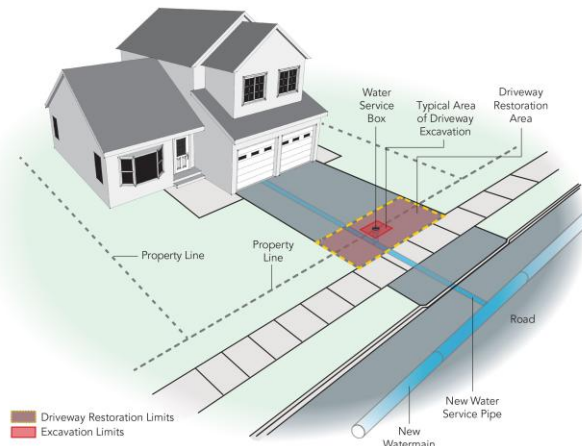

The contractor will replace any damaged sod on the boulevard or your front lawn and will take care of it for 30 days. You can help the sod stay healthy by watering it. A longer watering works better than watering more frequently for a shorter time. Early morning watering allows more water to soak in.

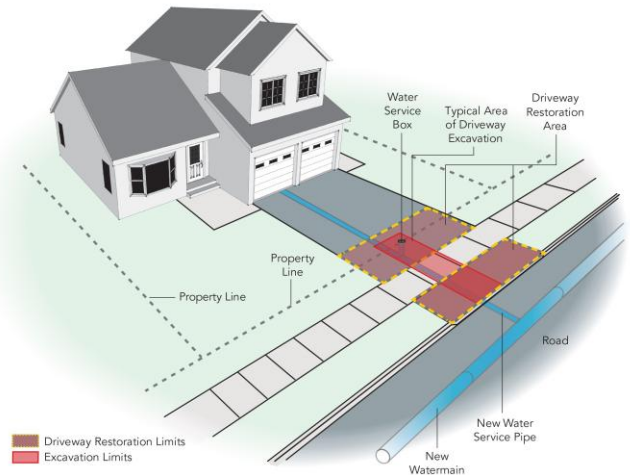

Repairing driveways

- **Interlock or concrete driveways:** If we damage a portion of your driveway, our contractor will repair the damaged portion.
- **Asphalt driveways:** If we need to cut a section of your driveway, it will be repaired by paving a strip over the impacted area, resulting in minimal seams. **Peel cannot replace your entire driveway.** If you would like to have the rest of your driveway paved, please contact the contractor, World Quality Construction Inc., at (416) 802-8339. The contractor will then share contact information for the company hired to do the paving repairs. **Please remember this is your choice. If you decide to have your entire driveway repaved, this extra paving work is your responsibility and outside Peel Region jurisdiction.**

Trenched water service installation: Driveway restoration with sidewalk

Trenchless water services installation: Driveway restoration without sidewalk

Trenched water service installation: Driveway restoration without sidewalk

Repairing roads

We'll pave the road where it was affected by construction. This work will start around **end of October**, weather permitting. We'll deliver more detailed information closer to the start date.

Temporary restoration

The City of Mississauga is planning to complete road work on these streets in the coming years. If this work impacts driveways, curbs, sidewalks, and lawns next to the sidewalk, we will:

- Only pave the areas of the street directly impacted.
- Use asphalt to fix damaged sidewalks and curbs.
- Patch your driveway to cover any places we impacted, as the future road work may affect the bottom of your driveway. After the City of Mississauga paves your street, the driveway will be repaired by paving a strip over the impacted area, resulting in minimal seams.

Peel Region repairs are temporary, as the City of Mississauga will complete restoration as part of their road work. They will send you a separate notice about their construction

Warranty on construction repairs

All work is warrantied for two years from the completion date.

It is normal for repaired areas to settle. Let us know if you notice large potholes forming where the driveway, street, or lawn was repaired, and we'll ensure these are fixed before the warranty period ends. Once the warranty period is over, Peel is no longer responsible for fixing potholes or dead sod in these locations.
